

DASHBOARD INSIGHTS

Meta Ad Performance Analysis

1. KPI Metrics

- Impressions: 339.8K: Total times the ads were shown. Good reach.
- Clicks: 40.1K: Number of people who clicked on the ads.
- Shares: 2K, Comments: 4.1K: Indicators of organic engagement (beyond paid reach).
- Purchases (Conversions): 2K: Real customer acquisitions from ads.
- Engagements: 46.1K: Sum of clicks, likes, shares, comments.
- CTR (Click-Through Rate): 11.48%: Strong performance (above industry average ~1-2%). Ads are very attractive.
- Engagement Rate: 13.27%: Very healthy; content resonates with the audience.
- Conversion Rate: 5.25%: Out of all clicks, 5.25% converted into purchases. Good but could improve with landing page optimization.
- Purchase Rate: 0.60%: Out of impressions, only 0.60% resulted in purchases. Low conversion funnel efficiency (room to optimize).
- Total Budget: 2.5M: Total ad spends.
- Avg Budget per Campaign: 50.7K: Suggests multiple campaigns were run.

Insight: Ads are performing strongly in visibility and engagement, but actual purchase efficiency is weak: need to optimize targeting/landing pages.

- High CTR (11.48%) and Engagement Rate (13.27%) → clearly indicate that the ad creatives, messaging, and targeting at the top of the funnel are very effective.

People are interested enough to click, like, share, or comment.

- Low Purchase Rate (0.60%) and only 2K conversions out of 339.8K impressions
→ shows a sharp drop-off in the lower funnel. This is a classic case of "awareness and interest" being strong but "action (purchase)" being weak.

2. Engagement Breakdown

- By Gender (Donut Chart)
 - + Female: 19K (41%)
 - + Male: 11K (24%)
 - + Other/Not Specified: 16K (35%)

Females engage more than males; campaigns could be tailored toward female audiences.

- By Target Age (Bar Chart)
 - + Peak engagement: 20–30 age group (especially early 20s).
 - + Drops significantly after 35+.
- Primary audience = Young adults.

Insight: Target ads towards females aged 18–30 for better ROI.

3. Geographic Distribution

Top Engaged Countries: US, UK, Canada, India, Germany are major contributors.

Insight: Focus campaigns in US & UK (high potential & engagement), and premium campaigns in Mexico/Japan (better conversion potential due to higher purchasing power).

4. Time-Based Trends

- Weekly Engagement Trend (Stacked Bar)
 - + Fairly consistent across weeks, with no sharp drop.
 - + Steady engagement shows ads maintain attention.
- Hourly Engagement Trend (Line Chart)
 - + Peaks around noon & evening (~12–13, ~18–21 hours).
 - + Lowest engagement early morning (~0–5 hours).

Insight: Schedule ad delivery during noons & evenings for maximum impact.

5. Calendar View

- Engagements are mapped to days in June.
- Certain dates (like 1st–3rd, 19th–21st, 23rd–26th) show higher highlights.
Campaign activity peaks on specific days, possibly due to launches/promotions.

Insight: Weekly promotions/events significantly drive engagement.

6. Analysis by Ad Type (Bottom-Right Table)

Ad Type	Impressions	Clicks	CTR	Purchase Rate	Engagement Rate	Conversion Rate
Carousel	86.7K	10.2K	11.72%	0.60%	13.45%	5.13%
Image	88.2K	10.5K	11.88%	0.55%	13.64%	4.67%
Stories	108.9K	12.8K	11.73%	0.63%	13.55%	5.34%
Video	56.0K	6.7K	11.90%	0.60%	13.74%	5.07%

- **Video ads** have the highest CTR, CR, ER (best-performing).
- **Stories ads** also perform strongly with higher impressions.
- **Images/Carousels** have decent performance but slightly lower conversions.

Insight: Focus budget more on **Video & Story ads** for better ROI.

7. Final Insights & Recommendations

1. **Strong awareness & engagement** (high CTR & ER), but **low purchase funnel efficiency**: need better conversion strategy.
2. **Target audience**: Females, 18–30, especially in India & Brazil.
3. **Best ad formats**: Video > Stories > Carousel/Image.
4. **Timing**: Schedule ads in the **noon & evening slots**.
5. **Budget Optimization**: Shift more spend to high-performing geographies and ad formats.
6. **Action**: Improve **landing pages, offers, retargeting campaigns** to lift purchase rate.
